

## **2.5 Days DLCC Training**

- 1. Fundamentals of TCO.**
- 2. Life Cycle cost basics**
  - 2.1.1. Introduction and Definitions
  - 2.1.2. Life cycle phases and costing
  - 2.1.3. LCC Modeling
- 3. Getting Started**
  - 3.1.1. Installation
  - 3.1.2. Running the program for the first time
  - 3.1.3. Passwords and permissions
  - 3.1.4. Users Manager
- 4. D-LCC Basics:**
  - 4.1.1. Introducing D-LCC
  - 4.1.2. D-LCC Fundamentals
  - 4.1.3. Basic Features
  - 4.1.4. Definitions of Projects
  - 4.1.5. Creating New project
  - 4.1.6. Opening and changing an existing projects
  - 4.1.7. Project properties
  - 4.1.8. Renaming and saving
- 5. Import & Export**
- 6. Building a Project**
  - 6.1.1. Libraries
  - 6.1.2. Alternatives
  - 6.1.3. Periods
  - 6.1.4. Global variables
  - 6.1.5. Local variables
  - 6.1.6. Tables
  - 6.1.7. Attributes
- 7. PBS, CBS**
- 8. Model and Expression Builder**
  - 8.1.1. Basic and Advanced Model Algorithms
  - 8.1.2. Standard functions
  - 8.1.3. Table functions
  - 8.1.4. Tree functions
- 9. Financial and Budgetary methods**
- 10. Maintenance methodology (level of repair trade off)**

## **11. Calculating LCC**

- 11.1.1. Cost calculation
- 11.1.2. Fast calculation
- 11.1.3. PV calculation
- 11.1.4. Sensitivity Analyses
- 11.1.5. Calculation by PBS
- 11.1.6. Cost effectiveness calculation
- 11.1.7. ORLA

## **12. Reports**

## **13. Tools**

- 13.1.1. Set value
- 13.1.2. Menu
- 13.1.3. Options
- 13.1.4. Grid
- 13.1.5. Organize
- 13.1.6. Compact
